Effects of the Crusades:

The Crusades are a forceful example of the power of the Church during the medieval period. The call to go to the Holy Land encouraged thousands to leave their homes and travel to faraway lands. For those who stayed home, especially women, it meant a chance to manage affairs on the estates or to operate shops and inns.

European merchants who lived and traded in the Crusader states expanded trade between Europe and Southwest Asia. The goods imported from Southwest Asia included spices, fruits, and cloth. This trade with the West benefited both Christians and Muslims.

However, the failure of later Crusades also lessened the power of the pope. The Crusades weakened the feudal nobility and increased the power of kings. Thousands of knights and other participants lost their lives and fortunes. The fall of Constantinople weakened the Byzantine Empire.

For Muslims, the intolerance and prejudice displayed by Christians in the Holy Land left behind a legacy of bitterness and hatred.
