The Bubonic Plague/Black Death!

Objective: What is the significance of the Bubonic Plague?

Plague Video Notes: <https://youtu.be/mVSHieg9Jac?t=4s>

Who?	What?	When?	Where?	Why?

The Plague's Impact: <http://www.tubechop.com/watch/8362890>

Religious	Economic	Politics	Social

Pulse Questions

1. What did the people believe caused the plague?
2. Who was used as the scapegoat of the plague?
3. What were some of the effects of the Plague?
4. What is the significance of the Bubonic Plague?

The Black Death Rap

It's during the Middle Ages during the 1300's (1347)
People started to get sick but no one knew what caused it
Said to have started in China and to have spread to Europe
Due to Fleas on Rats that got on to Trade Ships
These ships set sail from the Middle East
Spread the disease to European port cities.
The disease spread fast it was very quick
It was contagious, so a sneeze or cough could make you sick

Medieval people didn't know germs cause disease
That the plague was being spread by the rats and the fleas
They believed it was caused by a higher power
As a punishment from god because of Religious Doubters
So they turned to the church hoping they could be saved
The prayed and repented but nothing seemed to change
People got sick and people died
People lost faith, church power declined

Ring around a Rosie, with your pocket full of posies
If you have the following symptoms, then you might not want to get cozy
Do you have buboes under you armpit
Or a fever making you vomit?
By day 3 did you notice that
Your skin is covered in dark blotches
By day 4 it attacks the Nervous System
Causing seizures and pain for the victim
By Day 5 if you're still alive
And the buboes burst
Then you might survive
But most of the time
The people die
Cause they had no cure, and that is why

At least 1/3 of Europeans lost their life
The Feudal system collapsed When population decline
With fewer workers, supply was low, demand was high
So the rich paid the poor for the goods they wanted to buy
Now the poor got paid, quality life increased
Creating a middle class in the social hierarchy
As time went on the number of deaths decreased
And the legacy of the black death live on in history
